SUMMARY

Software Developer building and shipping cross-platform iOS, Android, and web applications with C#, .NET MAUI, Blazor, and ASP.NET Core. Delivers REST API integrations, CI/CD releases, and cloud-backed business features, while supporting device operations and production troubleshooting. Recent app redesign work improved download volume and store visibility for a 2,000+ user product.

SKILLS

- Languages: C#, SQL, Python
- Frameworks & UI: .NET MAUI, ASP.NET Core, Blazor, Razor, MudBlazor, XAML, Syncfusion
- Tools & Platforms: Git, GitHub Actions, CI/CD, Azure, Firebase, Cosmos DB, iOS, Android
- Engineering: REST APIs, cross-platform development, authentication, debugging, app deployment, device integrations

WORK EXPERIENCE

Software Developer, G&A ROBOT, Burnaby, BC. June 2026–Present,

- Led the redesign and upgrade of a production .NET MAUI mobile app serving 2,000+ users; following release v1.4.5, average daily downloads rose 323%, App Store impressions increased 224%, and conversion improved from 28.7% to 36.1%.
- Develop cross-platform iOS and Android applications and web administration systems using C#, .NET MAUI, Blazor, Razor, MudBlazor, and ASP.NET Core.
- Build operational features for CRM, machine controls, recipe configuration, payments, authentication, localization, and customer-facing experiences, integrating REST APIs with cloud-backed systems.
- Support software workflows across 200+ connected machines; troubleshoot mobile build, device integration, platform lifecycle, signing, and production-release issues.
- Maintain Git-based development and CI/CD workflows, including GitHub Actions and self-hosted macOS builds for mobile releases.

Business Intelligence Developer, G&A ROBOT · BITMAN Consulting Project, Burnaby, BC. March 2026–May 2026

- Designed and delivered 13 interactive dashboards covering revenue, device performance, and customer analytics using Blazor, Syncfusion, and .NET MAUI.
- Integrated REST APIs, modeled operational datasets, and built responsive reporting tools to turn transaction data into business insights.

EDUCATION

Diploma, British Columbia Institute of Technology (BCIT), May 2026

Business Information Technology Management (Data Analytics Management)

- Combined business, technology, and data analytics to develop practical solutions and support data-driven decision-making.
- Built dashboards using Power BI and analyzed data with Python, SQL, and Excel, applying statistical modeling, forecasting, and business process improvement.

LEADERSHIP

BITMAN Association, Vice President of Outreach, Burnaby, BC, June 2025–June 2026.

- Coordinated industry outreach, partnerships, and networking activities with external stakeholders and student leadership.
